Quality

NEW JERSEY IRON WORK SHOP W.L.L was founded with the purpose of offering top-notch services in steel fabrication and construction. We are dedicated to providing high-quality construction works by upholding a robust quality management system that not only meets but exceeds the expectations of all our stakeholders. Our primary aim is to satisfy the requirements of our interested parties, including compliance with statutory and regulatory obligations.

We are committed to continually improving our quality management system and striving for excellence in every aspect of delivering superior products and services. This commitment involves embracing innovative approaches and maintaining an unwavering dedication to quality and effective management practices. Our ultimate goal is to enhance customer satisfaction and ensure timely project completion in diverse environmental contexts.

Safety

Safety is of paramount importance to NEW JERSEY IRON WORK SHOP W.L.L, and it is deeply ingrained in our everyday work culture. Our Health, Safety, and Environment (HSE) program is designed to prevent injuries, prioritize the well-being of our employees, ensure security, and minimize our environmental impact in all our operations. We take extensive safety measures before, during, and after every task, strictly adhering to our Health, Safety, and Environmental policy.

We fully recognize the significance of safety awareness and training in preventing accidents and incidents. As a result, our employees undergo comprehensive safety training and awareness sessions regularly. These sessions include both general and departmental toolbox meetings, aimed at educating our staff on how to carry out their responsibilities safely, efficiently, and in compliance with relevant local regulations and international standards. Our ultimate safety objective is to achieve ZERO incidents and maintain an accident-free and environmentally friendly workplace.
